Handbook of Blockchain, Digital Finance, and Inclusion, Volume 2: ChinaTech, Mobile Security, and Distributed Ledger emphasizes technological developments that introduce the continuing future of finance. Descriptions of recent improvements lay the foundations for explorations of feasible solutions for banking institutions and startups to grow. Explains the practical outcomes of both technologies and economics to visitors who want to learn about subjects related to their specialties. Encompasses alternate finance, financial inclusion, impact trading, decentralized consensus ledger and applied cryptography. Provides the only advanced methodical summary of these subjects available today. Written for learners and practitioners, it helps lead the way to future possibilities. The mix of studies on blockchain systems and applications, regional financial inclusion movements, improvements in Chinese finance, and security issues delivers a grand perspective on both changing sectors and lifestyles.
