Bitcoin has gone from around US\$300 in January 2015 to about US\$20,000 in December 2017 and back down to US\$6,500 in September 2018.. This book demonstrates how Bitcoin's success has demonstrated to the world that it's possible to build, deploy and support a completely decentralised digital currency. Cryptocurrencies and the blockchain are revolutionising the globe as we realize it.. But despite the booms and busts, there's still a lot of money to be produced from the volatility of cryptocurrencies. He also shares some of his winning trades. In the ground-breaking book, Eric Wade: - Busts the myths about bitcoin- Explains how bitcoin and its own blockchain functions- Follows the cryptocurrency cash trail- Introduces the J-Curve and steps to make money using it to trade cryptos- Clarifies all you need to learn about crypto exchanges and wallets- Demonstrates how to buy your first bitcoin and start small. and it's only the beginning.
