It is the 1950s and simply beyond the Newfoundland fishing village of Haire' Narrated by the incomparable Mary Walsh.s grandmother Lizzie. The three live a lifestyle of hardship, but there exists a lot of like in this family members. A tragic chain of events leads to needs that Josie be delivered to an institution and Package to an orphanage.s relationships with her friends and her family members. Alliances are created with an odd range of heroes and the village can be thrown into a turbulent upheaval that tests the strength of Kit's Hollow, fourteen-year-aged Kit Pitman lives with her mentally handicapped mom, Josie, both of them cared for and protected by Kit'

Great publication - read it in two sittings! But when you can suspend your disbelief, it's an excellent read. It was a lot to bear for a teen and I could experience her frustration as well as her solid devotion to her family members. But it was an interesting premise regarding Kit's living circumstance and that kept me reading. Her mother is also the neighborhood "fun time female" and is not very particular about who she takes up with (receiving lots of the town's scorn, however, not as much as you may expect--there is a level (unrealistic? She was correct. The first pages were hard to get through because of the dialect but once that character wasn't central anymore, the tale flowed. I finished up finishing the publication on the second night of reading it because I acquired so thinking about it. The personas and area added a truly unique spin to the publication. I recommend it! It was highly recommended to me by a person who grew up in the ... Among my rare 5 star selections. This book had quality writing, well developed characters and unexpected twists. It was highly recommended if you ask me by someone who was raised in the region where this story took place. She vouched for the authenticity that the writer brought to the region. I was caught up in her storytelling and

appeared forward to time for the gully every time I place down the book. It never came! I needed this reserve for my summer college. Plenty of other tragedies hit (like the regional drunk attempts to rape the family members and is killed by the retarded mom and Sid requires the blame) but, most of all, Sid and Kit discover out they are half brother and sister (the reverend acquired sex with Kit's mom--surprise, surprise). Two days ago an email found me saying it is not shipped yet! I said I don't require it anymore, cancel it. I hope they do! Five Stars Another great book by a really great author! Engaging examine with vivid descriptions of Newfoundland's unique culture, dialect & Sid and Kit's relationship is not well developed but perhaps their position as outsiders will do to bring them jointly). There are always a good number of secondary characters mainly because we see what life is similar to in the small coastal village of Haire's Hollow. I found Morrissey's writing to be extremely engaging and lyrical as she vividly describes Newfoundland and its culture, unique dialect and little coastal town feel. I wasn't sure what to expect when I finally received it. Sid, the reverend's child, is entailed to cut the wood for the family. Therefore believable that there were several times when I acquired frustrated using what Kit had to cope with every day with her mom, Josie. Various members of the golf club had solid reactions to it (some enjoyed it, some hated it and may barely finish it). My Review: The fact that this reserve is set in a remote Newfoundland village in the 1950's caught my attention since I'm always searching for new (or at least 'fresh to me') Canadian authors. There was one picture that had me nail biting/in the edge of my chair but unfortunately I saw the major plot twist from a mile away. It would have already been great if the 'bad guy' had some redeeming quality or take a glance into why the resident 'mean girl' is so suggest (she reminded me most of the spoiled Nelly Oleson from Little Home on the Prairie fame, a graphic I couldn't shake through the entire book). I only want the reader got to learn more about these exclusive characters - some of which, if I'm being honest, were just a tad as well cliched for my tastes. Even when i figured it out I was longing for a crimson herring but that however never happened. It was still a solid read but I'd have loved to have had just one more twist. Following the plot twist was uncovered the publication felt a little jumbled and out of sorts with the closing being the weakest area of the book. General, this was an enjoyable go through with a wonderfully eastern Canadian experience to it. It's definitely one of regional peculiarities but anyone that has grown up in a little town will recognize many of the heroes. I look forward to reading more from this author. My Ranking: 3. Morrissey is skilled author whose profession I look forward to following. thebakingbookworm.blogspot.ca). Compelling storytelling from a talented author Morrissey took me personally to rural Newfoundland, with the tang of salt and wide sights of the sea. Her vivid writing produced me value the characters in the novel. Recommend. When she was created, she's been told, the city attempted to take her from her mom and put her in an orphanage but Grandma and the local Doc avoided that from taking place. With so many books waiting to be read, I figure any reserve that makes me tell you farewell to it with a sigh gives me more than fair exchange for the time invested. 5/5 stars*** This book critique, and also many more, can also be found on my blog, The Baking Bookworm (www.suspenddisbelief.com for an excellent read More interesting that the 1st pages indicated. 12 calendar year old Package lives with her grandmother and retarded mom at the advantage of town. One individual told me to force through reading the initial 40-50 pages in the first sitting down or I wouldn't get back to it.) of understanding among the towns people). Prematurily . in the publication I determined where it had been going so missed the part of surprise when the big reveal came, but I was still completely caught up in the tale and sad to view it come to an end. When her Grandma dies, Kit is immediately worried about this

potential outcome, and she is right to be worried. Sid and Package fall in love. Package, Josie and Grandma Lizzie's characters were well thought out and felt extremely believable. The reverend in town movements to have her taken away but Doc comes to the rescue and, moreover, gets the city to supply help the the retarded mom and young lady. The institution will end tomorrow. The last section of the novel is Kit's attempt to cope with this center breaking information. The novel is somewhat overly dramatic and unrealistic (Kit is only 16 when she marries Sid; community. We bought this to learn for my book club."
