Centralized Control with Decentralized Execution: Never Divide the Fleet?

Air Force Doctrine Record 1, the USAF capstone doctrine record highlights the tenet of centralized control with decentralized execution as essential to the effective software of airpower. However, numerous forces are changing the applicability of this doctrine. Simultaneously, the development of Network Centric Warfare can either centralize or decentralize the control and execution of air power. US involvement in wars with limited aims, combined with the technology which allows senior commanders to start to see the common operational picture and watch from the cockpit is driving a tendency towards the centralization of air power execution.
