Improving Time Sensitive Targeting Operations with Decentralized Engagement Authority

[continue reading](#)

Commanders atlanta divorce attorneys major combat operation since Operation Desert Storm dedicated many joint forces to the prosecution of great concern strategic targets that either posed an immense risk to coalition forces, allies and neutral states or were so fleeting in nature that they would have to be engaged quickly lest the prospective be lost. While this apparently ensures safety of procedures, in addition, it violates the Air Drive doctrine of centralized control, decentralized execution and eventually lengthens the kill chain timeline with possibly negative impact on the ability of joint fires to activate the high concern, fleeting target. Due to the strategic character of the prospective and the ramifications of incorrect decisions, recent combat procedures and joint exercises involving time sensitive targets (TST) employ with increasingly higher levels of centralized engagement authority.
