Secret Genealogy II: The Jewish Roots of Our Christian Ancestors

[continue reading](#)

In Secret Genealogy II, not merely does the writer reach our ancient Jewish ancestry, but the gray area of interlocking tribes of antiquity, with whom a lot of us share our DNA. Top secret Genealogy II, takes another deep check out the meanings of brands in our family members trees, continuing to explore the theory that America was constructed on a stronger Jewish basis, than what was originally believed by historians. Why did the family members hide their unique surname? When it comes to genealogy, why do families have therefore many secrets? What were they trying to cover? And why do they change it out? Why say you're from Holland (Italy, Germany, or other) if you are not really? This mesmerizing trail delves into the contradictions of American surnames and attempts to answer a few of the questions due to the inconsistencies we run into when ancestry searching. Why did they conceal the united states that they originally came from? Secret Genealogy II can help you answer those questions.

Secret Think once more she was wordy and redundant info. I appreciate her factors, tho think she got overly enthusiastic on her agenda Secret Genealogy II Interesting, but doesn't increase much to the 1st book, Key Genealogy. I would suggest one or the other, but not both. Virtually repeats it with a few additions.
