## Mastering Bitcoin - A Beginner's Guide To Start Making Money With Bitcoin

[continue reading](#)

Bitcoin is a cryptocurrency and an electronic payment system invented by an unknown programmer, or several programmers, under the name Satoshi Nakamoto. 8 million unique users utilizing a cryptocurrency wallet, a lot of them using bitcoin. The machine is peer-to-peer, and transactions happen between users directly, without an intermediary. These transactions are verified by network nodes and documented in a public distributed ledger known as a blockchain. Because the system works without a central repository or one administrator, bitcoin is called the initial decentralized digital currency. As of February 2015, over 100,000 merchants and suppliers accepted bitcoin as payment. Besides becoming created as a reward for mining, bitcoin could be exchanged for other currencies, products, and solutions in legal or dark markets. According to research made by Cambridge University in 2017, there are 2.9 to 5. It had been released as open-source software program in 2009 2009.
