Me thinks these 5 star reviews are frauds. What say you? Basic intro to bitcoin and blockchain, less technical Good for true newbies. One must look no further than the title of this page, the word is usually spelled Explanation, not Explaination. I'll be honest. I did not buy this reserve. I just read the reviews. THEREFORE I surmise these other testimonials were paid for. And each and every damn one of these sounds like it was written by somebody who will not understand English (or any language for that matter) and who didn't in fact read this book. Paid? WTF. Are these reviewers 4 years old? As expected, it doesn't explore specifics on effect to governance, protection or deep blockchain applications.
