This fun, thought provoking 48-page book of puzzles, evolves mathematical reasoning and critical thinking skills that are vital to achieving academic and lifelong success. They're ideal for introducing learners to encryption, algebraic thinking, and basic education operations. It compels college students to break a key code to allow them to identify a concealed joke. The challenge gets all the information out of each clue! To break the code, students must apply logic and mathematical reasoning to 3-models of clues. This reserve familiarizes students with classic, good-humored jokes that both kids and adults enjoy. Once college students break the code, they are able to solve the cryptogram by substituting the quantities with their corresponding code letters. It also helps ELL/ESL learners further understand the English vocabulary and culture.

For the Love of Learning All the materials put out by Critical Thinking Press are fantastic. including adults! They offer concrete lessons of learning for all age groups... Activities that make learning fun, challenging and memorable. And very repetitive. Two Stars Way too possible for my fifth grader. Like this publication and all the others too! Five Stars Good Five Stars Great for our homeschool Five Stars Fun books
