The modern world turns on universally-accepted ideas of currency and ownership. Bitcoin, and its own underlying technology, offer the potential to move control of these key institutions from change-prone governments to a protected storage system that independently records value and possession in a distributed general public ledger called "the blockchain. Purchase of the printing book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. Grokking Bitcoin opens up this powerful distributed ledger system, discovering the technology that allows applications both for Bitcoin-based economic transactions and using the blockchain for registering physical property ownership.
