A good quality read!Negatives: Should available to worldwide readers in a cheap shipping rate besides US and the EU. The first content on this Bitcoin magazine can be an FAQ about Bitcoins that may answer the majority of my doubts about Bitcoins such as for example "How fast are the purchase of Bitcoins? As normal, an article about principles of Bitcoin cryptography in basic English for individuals who are really interested to understand Bitcoins. This problem can solved by using a trusted 3rd party supplier." because every deal requires at least ten minutes to obtain one confirmation from the network. The amount of ads are acceptable , nor hinder my pleasure of reading Bitcoin periodicals! Pros: A useful resources for all the Bitcoin enthusiasts out there!
