## Bitcoin, Blockchain and Fintech

[continue reading](#)

Bitcoin has caught worldwide attention recently due to the meteoritic rise in price. It also integrates artificial intelligence, internet, cloud processing, Big Data and other nascent technology, such as for example 5G network, IoT. At its peak, Bitcoin marketplace capitalization reached US\$321 billion. No asset course in the history of the world has such spectacular overall performance. Some call it a bubble. Certainly, its cost crashed in Q1, 2018. This book provides a comprehensive introduction and a wide overview of the subject matter. Blockchain claims to revolutionize the economic industry. World leading finance institutions are flocking to the development of Fintech. A fresh branch of technology exists - Fintech. Fintech incorporates more than just the blockchain technology. Just in 2017 by itself, its price has truly gone up by 1,451%. It promises to improve the world beyond reputation. However, its significance isn't its role as a cryptocurrency, but instead its underlying technology - the blockchain.
