I have a big interest for cryptocurrencies since it may be the next big point, which will change the way we interact in daily basis including the way we buy our morning coffee or how exactly we place an order in Amazon. The reputation of Bitcoin from the rise of a fresh technology, to create Blockchain. Of course in every new technology, they are a few people who wish to make use of the uneducated traders and promise them that they will be rich fast. Despite the fact that Bitcoin reached traditional highs the previous few weeks (above \$ 8,000), that's only the start as significantly less than 1% of the global inhabitants holds any kind of cryptocurrency. The good part is that we are early in the crypto revolution. Blockchain will change just how we conduct economic transactions and it will create possibilities for early investors. The bad component is that we are also early in the crypto revolution. The purpose of this book is normally to highlight that scams are just about everywhere in fact it is our work to judge them, before we place our funds in a particular cryptocurrency with the proper execution of ICO - Initial Coin Offering. I will present the requirements for evaluation of an ICO, how to locate them and where you can store them in the event that you decide that they value your money.
