# Bitcoin: The Ultimate Guide To Understanding Bitcoin, Cryptocurrency, and Blockchain Technologies (Volume 1)

[continue reading](#)

Bitcoin is an electronic currency created in '09 2009 that uses decentralised technology for secure payments and storing money that doesn't require banks or people's brands. It had been announced on an email circular in an effort to liberate money in an identical way to how the internet made info free. To develop bitcoins, users must generate blocks on the network. Bitcoin works on a open public ledger known as blockchain, which retains a decentralised record of most transactions that's updated and kept by all users of the network. Each block is established cryptographically by harnessing users' computer power and is after that added to the blockchain, allowing users receive by keeping the network operating. Scroll to the top of the web page and click INCREASE Cart for more information about this technology The maximum amount is just under 21 million bitcoin. A limit for just how many bitcoins could be created is constructed into the system so the value can't be diluted.
