Security and Privacy in an It World: Managing and Meeting Online Regulatory Compliance in the 21st Century

[continue reading](#)

Regulatory compliance has historically been a concern of only a company's legal and finance departments. Nevertheless, as e-commerce continues to dominate retail both in america and overseas, regulatory compliance is currently a major region of concern for this managers, everyone on executive groups, and whole boards of directors. authorities itself is usually in a rocky place with domestic politics threatening to stand in the way of business as typical for American companies. It will require boardrooms and network managers to target in partnership on conference new privacy mandates while also keeping networks secure from cyberattacks and data theft. On top of these worries, the U.S. Amid a recoiling global market place and bigger and more costly cyberattacks, the nexus of "what can our networks do" versus "what are our networks allowed to do" is a lot more complex. How will CEOs navigate this minefield centered around Internet independence? New privacy regulations coming from a few of the closest allies of america are increasing the necessity for all companies conducting business online to comprehend and abide by regulations that are in continuous flux.
