Biodiversity for Sustainable Development (Environmental Challenges and Solutions)

[continue reading](#)

Divided into three sections, this book explores the three main pillars of sustainable development, namely economy, environment and society, and their interlinkages in the regional level. The first section, Gain access to and Benefit Sharing (ABS) for sustainable development, targets international agreements and national legislation, and also the issues in implementing ABS in e. India.g. Subsequently, the next section examines the process of forming Biodiversity Management Committees (BMCs) at the Local Self Government (LSG) level to promote environmental sustainability, highlighting regional and community-level conservation initiatives which have resulted in the conservation of habitats and species. The 3rd section addresses poverty eradication and meals protection. The case research included demonstrate the way the combination of traditional understanding and modern techniques can enhance the productivity of traditional crop types, yielding greater benefits for communities. Further, it introduces visitors to new approaches to inclusive development, demonstrating that participation and grass root empowerment are fundamental drivers of equitable and sustainable advancement. The purpose of this quantity is definitely to disseminate the lessons discovered from these case research, and also the findings from projects already in place, which can offer recommendations which can be applied to similar problems elsewhere in an attempt to find environmental solutions for sustainable advancement.
