This book constitutes the refereed proceedings of the 17th Annual International Cryptology Conference, CRYPTO'97, held in Santa Barbara, California, USA, in August 1997 beneath the sponsorship of the International Association for Cryptologic Research (IACR).The quantity presents 35 revised whole papers selected from 160 submissions received. The papers are arranged in sections on complexity theory, cryptographic primitives, lattice-centered cryptography, digital signatures, cryptanalysis of public-key cryptosystems, info theory, elliptic curve implementation, number-theoretic systems, distributed cryptography, hash features, cryptanalysis of secret-essential cryptosystems. Also included are two invited presentations.
