The LNCS series reports state-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. these sublines include tutorials (textbook-like monographs or collections of lectures provided at advanced courses) state-of-the-art surveys (offering complete and mediated insurance coverage of a topic) hot topics (presenting emergent topics to the broader community) In parallel to the printed book, each new volume is published electronically in LNCS Online. The scope of LNCS, including its subseries LNAI and LNBI, spans the complete range of computer science and information technology including interdisciplinary topics in a variety of application fields.) Recently, many color-cover sublines have been added featuring, beyond a assortment of papers, various added-worth components; The kind of material published typically includes proceedings (published with time for the respective conference) post-proceedings (consisting of thoroughly revised final complete papers) research monographs (which might be based on exceptional PhD work, studies, technical reviews, etc. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious businesses and societies, LNCS is continuing to grow into the most comprehensive computer science research forum available.
