International Trends in Optics and Photonics ICO IV

Springer

Toshimitsu Asakura

International Trends in Optics and Photonics: ICO IV (Springer Series in
Optical Sciences) (Volume 74)

[continue reading](#)

This book provides broad and authoritative summary of research currently underway in the fields of optical science and engineering throughout the world. They are much less formal than the standard technical testimonials within academic journals and this is why is the book available to readers who aren't specialists in optical research and engineering. The contributions, which are compiled by internationally renowned scientists, are of particular curiosity to specialists and nonspecialists in the countless disciplines covered.
