Advances in Cryptology -- CRYPTO 2014: 34th Annual Cryptology Conference, Santa Barbara, CA, USA, August 17-21, 2014, Proceedings, Part II (Lecture Notes in Computer Science)

The two volume-set, LNCS 8616 and LNCS 8617, constitutes the refereed proceedings of the 34th Annual International Cryptology Conference, CRYPTO 2014, held in Santa Barbara, CA, USA, in August 2014. information-theoretic protection; The papers are arranged in topical sections on symmetric encryption and PRFs; formal methods; obfuscation; organizations and maps; lattices; protected computation - implementations. FHE; hash functions; side stations and leakage resilience; quantum cryptography; foundations of hardness; number-theoretic hardness;The 60 revised whole papers presented in LNCS 8616 and LNCS 8617 were carefully examined and selected from 227 submissions. key exchange and protected communication; zero understanding; composable security; secure computation - foundations; asymmetric encryption and signatures;
