Analysis Paper (postgraduate) from the year 2018 in the topic Sociology - Individual, Groups, Culture, grade: 75 - Distinction, Bournemouth University, vocabulary: English, abstract: By the

finish of 2017 almost everyone has heard about Bitcoin. Through the use of the 'personal enterprise concept' predicated on the neo-liberal description from Dardot and Laval (2013), this essay will look at the correlation between the increase of neoliberalism and the rise of Bitcoin.

Therefore, the topic of this essay is extremely relevant and aims to give an insight on Bitcoin and Blockchain technology, and also analyze the rise of Bitcoin from a socio-financial viewpoint. This essay will show how decentralization, the financial crisis of 2008, globalization, digitization and the neo-liberal mindset are the main factors that paved the way for Bitcoin and contributed to its advancement. By highlighting the sociological and financial circumstance that Bitcoin provides emerged from, the rise of Bitcoin can be explained. The essay may also look at the societal adjustments that occurred due to digitization to show why Bitcoin and Altcoins are ever more popular in today's network societies.
