[continue reading](#)

Agriculture plays a key role in the economy of Pakistan using its talk about nearly one-fourth to GDP. The growth of production in agriculture generally depends on the transfer of technology to the farming community. The present study was designed to determine the effectiveness of public sector expansion after decentralization in district Muzaffargarh. The data were collected with the help of a pre-tested interview timetable. For this purpose all the extension staff working in the Section of Agricultural Expansion served as research respondents.
