This book focuses on local environmental governance and decentralized natural resource management. Environmental problems are analyzed against the backdrop of new approaches to local development.: the quality, effectiveness and efficiency of environmental stewardship led by regional administrations, its transparency and accountability, and the manner in which environmental powers and authority are exercised at the local level.regional environmental governance? Particularly important may be the concept of ? It does this by linking local development concerns to broader democratic processes, and by transforming local populations from mere beneficiaries or users of natural resources (or, worse, ? The reserve highlights a fresh environmental approach aimed at integrating relevant technical actions into broader institutional frameworks and regulatory methods.targets?) into citizens endowed with simple civil rights.
