Food and Agriculture Organization of the United Nations

Environment in Decentralized Development: Economic and Institutional Issues (Training Materials For Agricultural Planning)

[continue reading](#)

This publication presents an overview of the concepts and definitions of environment and sustainable development, showing the need for environment and natural resources for the economies of developing countries. It review articles the role of federal government and the instruments at its disposal, in addition to regulatory instruments, to create a context where environmental issues are analysed and tackled. It provides basic knowledge and analytical tools related to environment/economy interactions and how these should be taken into account in decision-making at decentralized, or subnational, level.
