CHRIS SKINNER

Author of the bestselling DIGITAL BANK

"Chris Skinner: one of the most authoritative voices on FinTech anywhere" — Seth Wheeler, Former Economics Advisor to the US President and The White House

Chris Skinner

ValueWeb: How Fintech Firms are Using Bitcoin Blockchain and Mobile Technologies to Create the Internet of Value

The next generation internet, the Internet of Things, cannot work lacking any Internet of Value. The Internet of Worth? What does that mean for finance institutions, governments and citizens?-Jim Marous, The Financial Brand/Digital Banking ReportChris has a great eyesight for the case research and practical examples of innovation that enable you to really think about where banking is certainly going. The issue is that our old system cannot work that method, as it takes times to procedure and costs a fortune. Using a combination of technologies from cellular devices, wearables and the bitcoin blockchain, fintech companies are building the ValueWeb irrespective. or ValueWeb, for brief? This book supplies the answers.-Lawrence Wintermeyer, CEO Innovate FinanceThis is another must-read, not only for those thinking about the globe of FinTech, but anyone wanting to get a glimpse of a future where monetary and nonmonetary transfers occur instantaneously across portable and digital networks.- Seth Wheeler, Former Economics Advisor to the united states President and The Light HouseSkinner's ValueWeb can be a sweeping and well-researched analysis of the big technology trends that may shake the home windows and rattle the wall space of the industry-Don Tapscott, Best Selling AuthorThis publication will be a great read for all thinking about the way business works.-Sir Roger Gifford, Past Lord Mayor of LondonBest insight into profit the 3rd commercial revolution, aka the digital revolution, you will read. Chris Skinner probably the most authoritative voices on FinTech anywhere has provided us another timely and thoughtful look into the fascinating convergence of technology, e-commerce, and finance that's changing the globe. allows machines to trade with devices and people with people, anywhere upon this world in real-time and for free.-David Birch, Director Consult Hyperion

Five Stars Best authority on banking and its own long background with technology. A Roadmap

to an Economy That Combines Digital Technologies and Global Access The world of commerce is changing quickly and instantly. The economy is certainly global and even more accessible than ever, with new digital technology providing usage of the masses. Banks encounter big challenges, but he thinks (occasionally contrary to his anecdotes) that the biggest will survive. ValueWeb is crucial read. Skinner Another fantastic, well curved, and meticulously researched good article. The future provides Internet of Things together with your fridge buying groceries and your car generating itself to the petrol station to refuel. Bankers rightly dread an Uber event where they are bypasses completely or relegated to utilities by fast-moving fintech firms that take over the customer romantic relationship and provide added solutions and earn significant income that might have attended banks. Nevertheless, to the credit of the author, three stars may be the highest rating to the number of books on bitcoin/blockchain I got read and examined. Skinner provides an exceptional roadmap to the future of commerce in the digital age group. This is an excellent journey through the key topics, from technology to regulation and culture. Informative overview with small investment/business advice I have mixed feeling about this book. It really gives me much details but not what my next trading/investment move ought to be. Chris has been around the midst of the change and knows the leading, and lagging, banks all over the world and draws from their encounters, insights from fintech leaders, and his exceptionally well-informed views to provide interesting insights of where this could go. Well done Chris! Five Stars Great update on FinTech ValueWeb Looks At Who Will Win, WHO'LL Lose, And WHY IS The Difference Real-time mobile banking from anywhere anytime frequently meets legacy batch-structured banking systems designed to support paper interactions with branches. Another winner from Mr.
