Revised edition: 15-June-2015 within the latest developments, with updates about some companies and people mentioned in earlier editions. Bitcoin and the Bitcoin Ecosystem tells the fascinating story of the people and technologies which have given rise to a fresh industry and a fresh thought process about money. From the cypherpunks of the 1970's to the elusive Satoshi Nakamoto to the Winklevoss twins, the globe of bitcoin is populated with interesting people. This reserve will serve as a primer for those who are not used to bitcoin but have some familiarity with basic computer ideas and just a little bit of math. The technologies behind bitcoin, and moreover the unique way that they were combined to solve a difficult problem - how to prevent virtual currencies from getting spent more often than once - are equally important. These are the miners, digital wallets, bitcoin exchanges and bitcoin purchase vehicles that are the bitcoin ecosystem. We introduce you for some of the companies, many backed by venture capital, that are hoping to introduce bitcoin to a wider human population and prosper from its adoption. The assets list will guide you to the best sources for more specialized details and historical background.
