Feedback from purchasers (on various other sites): "This book and the author help me out and got me ready to go finally. The writer really goes far beyond by helping with questions through email. I would suggest this reserve to anyone mining digital currency with 280 cards. I spent hours working out the very best configurations for these cards. Conrad Olivier"This guy is the man. thankfully, RMA's with Radeon cards are fairly smooth. right now my rigs are rockin n rolin" Sal Mansy"Best Service From an Honest Person - He has learned his stuff - Would Trust. That cost me a fair amount of cash as I was mining BTC way after that was an excellent idea with GPUs.. Magnificent results but must have some good coolant system.This book has saved my butt!.. Rich Clarke".. before I acquired this publication I was lost. - xgalileo Matthew Hart"Very useful information for beginners. many months have past and my rig operates perfectly. Best guide in the marketplace, Thanks."These settings only require air cooling. To those that state that the knowledge is definitely 'out there for free' sure it is.!! The writer says in the reserve to get hold of him with any queries and I had taken him up on it and he was great help moving my bitcoin rigs to mining litecoins/scrypt. A move that was delayed greatly due to the scrypt learning curve.. This book and the author got me over the hump. The more negative reviews here obviously didn't consider up the author on his offer to contact him if you have any queries." there is also a ton of free ideas that will ruin your hardware rather quickly."5 years. I have tried many configurations and these have been the best so far.This guy knows what he's talking about. Kuroth"If your just engaging in mining or a practiced pro you will want this. I am a veteran pc tech, and an avid Bitcoin enthusiast. How can you know for certain?Helped get me from 1200+ WU to 1300+ WU... Thanks!" - rodneyphillips "I already had a lot of time invested in find out and fine tuning my rigs, but this guideline and direct support from the writer really helped out. Just how many hours do you want to sit in front of your rig, waiting for it to lock up or overheat? -

blueredy " Save yourself times/weeks of frustration and obtain your miners functioning at top output! Many thanks! What settings are the best?"
