Crypto Currencies: Why it has the potential to change the world

continue reading

"It'Bitcoin A Peer-to-Peer Electronic Cash System" It called a Technology that a lot of of us had never heard of called Bitcoin, but a little group of tech savvy internet surfers saw the potential in it and an initial version of the program was launched in 2009 2009.s the year 2014, and the globe offers witnessed something extraordinary, the rise of the Bitcoin. If Bitcoin had been a politician, its profession would have been over and forgotten, but Bitcoin can be a technology, an extremely ingenious kind of technology that will create a wave of transformation in relation to how economies work. It all started in 2008 with the now famous whitepaper entitled "It tells the story on how Bitcoin gained its world-wide attention and how it spawned several Crypto currency alternatives. You need to understand that although lucrative now, before 2013 the Bitcoin was relatively lower in value & most people involved do so because of the potential as an alternative to do financial transactions rather than the investment opportunity of a lifetime that some people see it today. Despite the waves of negative publicity it has already established to endure again and again, it' Cyprus was among those countries who noticed the potential early on as more and more banks shut down and conserving accounts become inaccessible. Bitcoin strike the spotlight in early 2013 when the first major gains in cost occurred, with the recession still putting a lot of pressure on countries around Europe something had to provide s still around and its cryptocurrency offspring are popping up like the kids of Genghis Khan with most of them across the world. compiled by the still mysterious Satoshi Nakamoto."This book talks about explaining the technologies behind the Crypto Currencies movement that is booming around the world in 2014. Since then the advancement power has drastically increased as increasingly more users became thinking about the potential that Bitcoin acquired. Wearing down why Bitcoin and other Crypto currencies have the potential to go the financial system out of the 20th century into the 21st century. The book also offers a clear warning about the chance of investing in crypto currencies and how exactly to place the Ponzi schemes and the valueless bitcoin clones. The writer Antonie Geerts is an experienced technologist and introduced the first Irish Crypto currency Gaelcoin in 2014. As a lecture and speaker Antonie has helped several universities around Ireland in understanding and building their own crypto currencies.
