

Accountancy for Olympiads

The background of the cover is a photograph of an open book. The pages are numerous and thin, creating a layered, fan-like effect. The entire image has a monochromatic blue tint, with the text in white. The book is open to a spread of pages, with the central gutter visible.

The Book "Accountancy for Olympiads" The Book provides:

- Keeping in mind that the college students are learning the subject for the first time, every effort has been designed to bring in the accounting principles and terminology in a straightforward language so that they understand them easily.
- understanding about the essential concepts of Accounting
- Solved practical complications to greatly help the learners in understanding the practical applications
- i. has been supported by the reason of each of these.

questions of olympiads International Commerce Olympiad has been carried out by Commerce Instructor's Association (Regd.National Commerce Olympiad' acts the purpose and has been created keeping in view the specific requirements of the applicants showing up for these Olympiads.) since 2007. was introduced and carried out by National Commerce Olympiad Basis in 2011 for the very first time. This is certainly a recent phenomenon for the senior school college students of Commerce stream." The questions that are asked in these Olympiads are Multiple Choice Questions (MCQs). is meant for Class XI learners of all the universities which are affiliated to CBSE, ISC and other State Boards having Commerce among the primary stream. Subsequently ' Comprehensive study material for developing learners' Good examples have been enumerated for his or her better understanding.Accounting treatments have been dealt with at length with good examples and solved practical problems which are supported simply by detailed description of " Explanatory answers for the hard practical complications are also supplied. of the problems. Accounting transactions are analysed by presenting them in tabular forms to be able to create a straightforward understanding and evaluation for the students. Planning of all ledger accounts, accounting books, financial statements, etc. Earlier years' Having an excellent experience in teaching the college students of Commerce of Classes XI & XII and also in developing articles for these classes offers helped me in determining the areas which are considered difficult by the students. These tough portions are explained in detail with suitable examples and by drawing analytical tables. After explaining this content of this issue, sufficient amount of MCQs provides been created for the students to apply. The book is divided into 17 chapters which comprehensively cover every single topic and sub-topics as prescribed in the syllabus of these Olympiads. The idea explained in this publication is in sufficient fine detail to resolve the exercise questions. Earlier years queries asked in International Commerce Olympiad from the entire year 2011 to 2017 are also incorporated in the exercises. Students are also given the ' tips' Extensive practice for answering large numbers of Multiple Choice Questions that they would be required to response in Olympiads •All the MCQs given by the end of a chapter are backed by Answer Key., the terms/ principles that they must revise from the earlier chapters of the publication before starting a fresh chapter.e.why" I am confident that the book will prove to be useful for the college students not merely for the Commerce Olympiads also for learning the subject of Accountancy.
