Me thinks these 5 star reviews are frauds. What say you? I just read the reviews. One must look no further than the title of this page, the word is usually spelled Explanation, not really Explanation. I'll be honest. I did not buy this reserve. Are these reviewers 4 years old? And each and every damn one of these sounds like it had been written by a person who does not understand English (or any language for example) and who didn't actually read this book. So I surmise that these other reviews were paid for. Paid? As anticipated, it doesn't explore specifics on influence to governance, protection or deep blockchain applications. Simple intro to bitcoin and blockchain, less technical Best for true beginners. WTF.
