Become familiar with more if you read the Wikipedia page Become familiar with more if you read the Wikipedia page. I've never bought a publication with so many typos and grammatical mistakes. The format of the book is atrocious, just like a 12 year old trying to make his book report 10 pages. Should have had an editor. This book feels as though it was written on a feature phone and sent . It seemed to get worse as I acquired further. I must say i can't adhere to the narrative for all the errors. The quantity of grammatical and typographic errors is unbelievable... This book feels as though it had been written on an attribute phone and sent to the printer without the editing. I've never bought a publication with therefore many typos and . Lots of repetition and small structure... and ultimately hardly any content. Not worth spending money on. Every other sentence has main typos and punctuation mistakes that make you return back and re-read the sentence (multiple occasions) to figure out what the author says... Plus the poor spelling and grammar means you will need to decode what he's talking about on nearly every convert of the web page. They're beyond just distracting. By a third of the way through, I couldn't go any further. Don't buy it. This Publication is a Joke This book is a joke. Very basic stuff. This is only a re-write of wiki pedia and internet content. This is only a re-write of wiki pedia and ... I started reading it and eventually remaining it on an airplane after recognizing that I could find out more about Blockchain through basic internet review. It is impossible to understand despite the subtitle stating otherwise. Significantly not useful. Three Stars this is just like a 20 page article devote big font and printed as a book Stay on top of blockchain technology. Inside this book you will learn about the best software of blockchain, different sectors in the market that will change due to it, to understand its challenges, also to consider the future of blockchain. I'd say this book would work to all who would like to be educated on the developments on cryptocurrencies like Bitcoin, as these currencies are here to stay.
