BITCOIN FOR YOU: How Bitcoin works, tips and strategies to learn, Everything you needed, Helpful especially for beginners

Bitcoin mining involves commanding your home computer to work night and day to resolve 'proof-of-work' problems (computationally-intensive math complications). Bitcoin mining is really profitable if you run multiple computer systems, and join several miners to combine your hardware power. Your desktop computer, if it works non-stop, might be able to solve one bitcoin problem in two to three days, likely longer. This very prohibitive hardware requirement is among the biggest security steps that deters people from trying to control the Bitcoin program. Each bitcoin math issue has a set of feasible 64-digit solutions. Indeed, if you are a small-scale miner with a single consumer-grade computer, you will likely spend more in electricity that you will earn mining bitcoins.
