# Supply Chain Finance and Blockchain Technology: The Case of Reverse Securitisation (SpringerBriefs in Finance)

[continue reading](#)

This book investigates how the Blockchain Technology (BCT) for Supply Chain Finance (SCF) programs allows businesses to get together in partnerships and accelerate cash flows through the entire supply chain. BCT promises to change the way individuals and corporations exchange value and information on the internet, and is perfectly positioned to enable brand-new degrees of collaboration among the supply chain actors. Industry giants such as for example IBM, Maersk, China-based Dianrong and FnConn (a Foxconn subsidiary) are currently attempting to digitize the global, cross-border supply chain using blockchain technology, and can likely shortly create blockchain platforms for supply chain financing. Using this framework, the book subsequently discusses relevant use cases designed for the technology, which could open up new possibilities in the SCF space. These solutions aim to reduce complexity and make data sharing more secure, accurate and efficient. After that, a possible blockchain-driven source chain model is described. or approved payables financing. It demonstrates that blockchain and distributed ledgers systems could deliver considerable benefits for all parties involved in SCF transactions, promising to expedite the processes and lower the entire costs of financing programs. The book reveals new opportunities stemming from the use of BCT to SCF financing solutions, particularly reverse factoring – To take action, it initially identifies the main barriers and pain factors in delivering funding solutions. This book offers a highly topical reference for stakeholders across the entire supply chain, helping them plan the upcoming technological revolution.

Outstanding contribution in the SCF discussion Interesting contribution to SCF discussion! I liked quite definitely the practical approach of blockchain in SCM and SCF. Besides the wellknown elements like reduction of the expenses of functioning capital, risk mitigation and EVA Also interesting description of SCF: part of liquidity in the Chain.
