One Star Repetitive, unedited, written by someone whose native language isn't English Loved this character in "The Usual Suspects"? Loved the film! English is a second language for the article writer and the writing needs some deft editing for clearness and grammar. Regarding the book, some information was generally there that I had been familiar with. Interesting choice. There are better and more interesting sources elsewhere. As everybody knows Keizer Soze (Keyser Soze) may be the fictional personality in "The Usual Suspects" and is just about the chosen pseudonym because of this writer. Poor English, errors, not useful Poor English, rambles about unrelated topics like food, no help in understanding Blockchain technology.
