Handbook of Digital Financing and Financial Inclusion: Cryptocurrency, FinTech, InsurTech, Regulation, ChinaTech, Mobile Protection, and Distributed Ledger explores recent advances in digital banking and cryptocurrency, emphasizing cell technology and evolving uses of cryptocurrencies as financial assets. Contributors go beyond summaries of standard versions to describe new banking business versions which will be sustainable and likely to dictate the continuing future of financing. Explains the practical implications of both technology and economics to visitors who want to learn about subjects linked to their specialties. Encompasses alternate finance, financial inclusion, influence trading, decentralized consensus ledger and applied cryptography. Provides the only advanced methodical summary of these subjects available today. Its capability to illuminate present potential and future possibilities produce it a distinctive contribution to the literature. A companion Volume Two of The Handbook of Digital Banking and Financial Inclusion: ChinaTech, Portable Security, Distributed Ledger, and Blockchain emphasizes technological developments that introduce the continuing future of finance. Written for students and practitioners, it helps lead the way to future opportunities. The combination of studies on blockchain systems and applications, regional financial inclusion movements, advances in Chinese finance, and security issues delivers a grand perspective on both changing sectors and lifestyles. Descriptions of latest improvements lay the foundations for explorations of feasible solutions for banks and startups to develop. The book not only emphasizes the financial possibilities permitted by digital banking, such as financial inclusion and influence investing, but also looks at engineering theories and advancements that encourage innovation.
