Decode over 300 themed lists using simple letter substitutions!

Penny Press

Penny Press Collector's Series Selected Puzzles Crypto-Families *Volume 70*

[continue reading](#)

Penny Press Selected Puzzles Crypto-Families *Quantity 70* *New* - That is a collection of a lot more than 300 selected puzzles from the editors of Dell, only obtainable directly from publisher. Many thanks for your interest and please be sure to see our other listings for more great books and collectables. Each Family members has it's very own code. The words in a Crypto -Family members list are related to a single theme or category indicated by it's name. The example given is a clue to the type of words to expect in the list and can help you guess what some of the words are. To break the code, search for words with special letter patterns, such as for example repeated or double letters. Hours of great puzzle fun! When a word in the list is normally correctly identified use the decoded letters to greatly help decode other terms in the Crypto-Family members. In no case will the contents of the publication become affected. In a few cases there might be slight put on or creasing to the cover due to the cover softness. PLEASE BE AWARE: All of our puzzle books are near mint to mint or better, in condition. A Crypto-Families is a list of related words in a straightforward substitution for the right one.
