Cryptocurrency is definitely blamed to become a volatile market, a bubble which will burst and many such terms have already been used that often scare investors and general public from investing in it. What economists and bankers do not understand is that cryptocurrency is normally nothing but a revenge of the nerds whose worth has been undermined since age groups now. They have come up with this extremely sophisticated tech, that has the potential to put a dent in to the universe, almost challenging all of the banks and finance institutions of the world. Still, it scares investors to place their hard-earned cash into Bitcoin, because if it comes crashing down, it will take everything apart with it. 50 years from today, we may also have trillionaires, and cryptocurrency will end up being completely responsible for it. In this e-book, I've not really only covered the fundamentals of crypto-currency and how exactly to invest in it safely, but I have also discussed the forecast of various cryptocurrencies, the ones that will give high returns in future for sure, and the ones which are suitable and best for short-term investment. 50 years ago we had no billionaires, but we do have them now. Similarly, believers are changing Gold into Bitcoins, and on the other hand, nonbelievers are scared to purchase crypto-currency, but 2017 only is a revolutionary season, which saw a significant rise in the market-cap of cryptocurrency as well as the overall investments made, which is normally further, highly in charge of the price hike of Bitcoin. Bitcoin prices have observed an upsurge in 2017, and the hearsay confirms that it will contact \$50 thousand, by 2018. After studying, and investing in the cryptocurrency market myself, for over one year, I have come to several conclusions that I have tried to compile in this e-book, and provide an insight in to the world of technology and crypto-currency.
