The detailed step-by-step process on learning Ethereum Mining! Chapter 5: WHAT EXACTLY ARE Cryptocurrencies? Mining may be the process of sorting through blocks in the blockchain, and approving of transactions. In an earlier chapter, we described how it's fundamentally the action of solving tough code puzzles. Blocks in Ethereum don't actually represent currency, they represent anything of value, therefore they take the form of smart agreements. In regular systems, there's one central authority that does this work, but because Ethereum is usually a decentralized system, it's up to all the nodes to ensure the record-keeping is normally accurate.
