Economy Monitor Guide to Smart Contracts: Blockchain Examples (Artificial Intelligence, Law and Finance Book 1)

Although the interest around smart contracts is generally defined in a narrow way, centered in applications terms such as Bitcoin contracts, Ethereum contracts or Smart Contracts Bitcoin, or even simply in technical trading aspects such as Ethereum price, the truth is the field is more diverse. A number of companies and non income organizations are serving governments, institutional and private clients implementing distributed ledger technology. In this accessible book, we present the detailed corporate profile of many smart contracts companies, their trading and social networking volumes, and provide a gentle introduction to smart contracts examples.Inside this publication:I Companies (Corporate profile, Funding, Group, Clients, Leverage factors, Regulatory compliance information)Interbit (BTL)SymbiontCounterpartyLiskBitSharesR3CEVRippleEthereumStellarChainClearmaticsII Social SignalsWhat is breakdown of followers and impact by twitter handle?
