Ethereum Smart Contracts for ICO Campaign: Programmers Guide

[continue reading](#)

Hands-on Tutorial on composing Ethereum Smart Agreements for an ICO (Group Sale) campaign. An example used in this book is not a simplified one: all industry standard features are given, including breaking crowd sale to levels, sending funds to multiple beneficiaries and using whitelisting. Full code samples included, options and different ways of doing things discussed (for instance, how to place ICO contract and Token Contract in the same file and how to do it using different files). The book is a great guide for developers that require to create smart contracts for ICO campaign, with on-demand features, fast and without reinventing the wheel.
