Trading strategy report for 2018 : Trading strategy report for 2018 Commodities, CFD's, Forex, Cryptocurrency

[continue reading](#)

In this technical analysis record, we covers developing trends, important amounts for trading and the most effective trading opportunities for all the asset classes, currency pairs, stock indices, commodities, and cryptocurrencies. Stock marketplaces are extending the uptrend in to the year-end. The last quarter of 2017, especially the last two months have brought us weakness and consolidation USD continuation, visible in every major currency pairs and crosses & most of the commodities. With this ongoing developments, we have gone from, range market structure in every asset classes which has lasted almost eight a few months, to trend marketplace structure which we believe will last the most portion of the next 2018. That's where we see the majority of the trading opportunities which could lead to big gains.
