NAVIGATING THE CRYPTOCURRENCY LANDSCAPE

Stuart Carapola

Navigating The Cryptocurrency Landscape (Tech For Everybody Book 5)

[continue reading](#)

Bitcoin made worldwide headlines in later 2017 with an enormous surge in value, starting the year at less than \$1,000 before you begin a year-long rally that led it within sniffing distance of the \$20,000 mark by the end of December. Though it's astonishingly rapid development started a news-fueled crypto craze that has both excited investors and drawn sharp criticism from those in the traditional financial sector. What's the blockchain technology they are built on, and how will it function? I'll learn all about Bitcoin, Ethereum, Ripple, Litecoin, Monero, and other main cryptocurrencies, how they work, and what actual purposes they serve that you don't see. But between the proclamations of skyrocketing prosperity waiting to be had and warnings of a bubble on the verge of collapse, what is the truth? Is cryptocurrency really meant to become an untraceable form of payment for criminals, or is it the best technology that's been mischaracterized by a news media hungry for scandalous headlines? I've struggled to keep up its worth since, Bitcoin or not, as an investor, considering investing, or just an interested bystander, this publication explains the intricacies of the cryptocurrency globe. You won't hear from the detractors. This book is for entertainment purposes only, and should not be interpreted as financial advice.
