Inclusive Stakeholding: A Revolution of Our Social Contract

Jeremy Yun, guitarist in the sociable activist band WJM, describes the genesis of Inclusive Stakeholding, a $1 million social technology fund which will support blockchain projects espousing the principles of inclusive stakeholding.characteristics which were inherent in the inclusive fitness of our prehistoric sociable systems.t hold the tokens. He highlighted the lack of dedication to others as a common denominator behind the myriad of seemingly intractable problems the globe faces today including corporate irresponsibility, political corruption, and sociable alienation.At the March For Our Lives rally in San Francisco this Planting season, Yun addressed a masses of more than 10,000 people at the Civic Center Plaza.The emergence of blockchain has created an unprecedented opportunity to reimagine our institutions based on inclusive stakeholding, goal congruence, and vested interest in the success of others—The fund provides funds to a go for group of blockchain initiatives that promote the greater good, including those who don' Could we tie the achievement of companies to that of their clients? Could blockchain allow us to tie the achievement of teachers to that of their pupils? Could we tie the success of elected officials compared to that of their constituents? Could we find ways to include the environment, potential generations, and others with out a voice, as stakeholders.
