Women, prosperity, worldly possessions - they are the themes that have fueled stories from forever. However, small did we know that the idea of money as we realize it would 1 day be turned ugly. A lot has been changed in last the two 2,000 years like the concept of cash itself. The globe is position at the right minute – It is worth mentioning that contrary of gradual decent of biological evolution, cash usually evolves in big jumps, from barter to composing on clay linens, from commodity based money to precious coins, from gold-backed paper currency to sovereignty-backed fiat and from digital credit-debts registers to state-released bonds. an ever-connected environment is calling for the next jump – This book explains the development of money from nothing to barter and from dinars to cryptocurrencies. In a world where close to 100% of the populace has access to cell phones, while only half has the usage of toilets or tooth brushes, it could be disappointing to find if cash does not evolve. a kind of money that can evolve brand-new traits, suitable for machine-to-machine and machine-to-individual interfaces for the globalized globe and where people can conduct trust-worthy transactions without intermediaries.
