Eco-Autonomous Organizations: Decentralized, Distributed and Autonomous Organizations; An Operational Viewpoint of Complex Adaptive Systems

[continue reading](#)

If you are looking for a new way to operate Decentralized, Distributed and Autonomous Organizations in the current nonlinear (complex) world, this publication will provide you with all the details had a need to run your organization predicated on Complex Adaptive Systems. The main flaw of our typical management system is the fact that it is predicated on principles and concepts for a linear world. Complex Adapting System can be used to describe how nonlinear systems (such as our brain, the market, weather conditions and ant colonies) will work. The traditional way to motivate people and organize work (management) is based on a system created one hundred years back for a linear world. To survive and thrive in a nonlinear world, organizations need to run on concepts and concepts that support effective systems working in a nonlinear way. This technique was extremely successful as long as the world was linear (complicated), but become an obstacle for agencies operating in a non-linear globe. This book explains in detail how to translate complex adaptive systems into a business that can survive and thrive in the current complex world.

Bravo! All movements take time to nurture. Let me see a v2 of the reserve with some visuals and real-world stories of transformation as teams begin to adopt this model. Five Stars! Though-provoking help with how institutions can/should be arranged today to take into account the present day business landscape. Clearly a lot of deep believed and interest went into writing this publication. It goes beyond high level philosophies with tactical help with implementation. This book is definitely a bold treatise on creating an organization to match the realities of contemporary business.
