# Compassionate Superintelligence AI 5.0: AI with Blockchain, BMI, Drone, IoT, and Biometric Technologies

[continue reading](#)

The book defines the concept of Compassionate Artificial Superintelligence AI 5.0. Furthermore, AI should work morally, socially, responsibly and compassionately. To do this aim the Dr. and algorithms. The gaps between human being and AI systems are reducing. The publication explains the need and urgency to develop the compassionate AI systems in today's world threatened with nuclear warfare, terrorism, corruption, rogue states and monster governments. It clarifies the five core technologies of compassionate superintelligence AI 5.0 are: artificial cleverness, quantum computing, cellular reprogramming, brain-computer interface, and IoT. It also explains the five characteristics of AI 5.0 are: Super-Intelligence, Super-Connection, Super-Compassion, Super-Imagination and Super-Consciousness. Establishing center to heart conversation is crucial. Ray proposes RayDeepCompassion of AI based systems. Now the primary dependence on AI. It explains the design and behavioral concepts of compassionate AI. Human beings and AI systems are co-evolving. But, with the emergence of new technologies and AI systems with bio-metric data storage, surveillance, monitoring and big data evaluation, humanity and the society is definitely facing a threat today from evilly designed AI systems in the hands of monster governments and irresponsible people. AI based program is that not merely it should serve humanity but also shouldn't do any injury to the individual liberty, society, environment and the humanity most importantly. Tomorrow's AI based systems must be able to understand individuals from its depth and not simply fulfill the surface area level requirements. Sensitivity towards human pain, errors, and sufferings must be the area of the evolving fresh AI systems. Serving humanity intelligently can be held up since the "gold standard" framework. Steadily they have become co-dependent. Humanity is on the verge of digital slavery. The book also discusses six modules of computational artificial consciousness. The true challenge is how to digitize and incorporate the individual values like compassion, forgiveness, bravery, morality, love and creativity in AI based systems. In this book Dr. Ray clarifies compassionate artificial intelligence comprehensive. The book provides the blueprint, directions, frameworks and ways of develop such compassionate artificial superintelligent systems in coming days.
