

# How Blockchain Will Disrupt Real Estate

The background of the entire graphic is a photograph. In the foreground, two hands are shaking in a firm handshake, symbolizing agreement or a deal. The hands are positioned in the lower half of the frame. In the background, slightly out of focus, is a two-story house with a grey roof and white trim, set against a clear blue sky. The overall composition suggests a connection between blockchain technology and real estate transactions.

From investing, lending,  
transaction, contract execution, to  
title and escrow

Using blockchain and intelligent contract technology, ownership, house specs, credit, mortgage approval, is all very easily verified. These the blocks will contain incorruptible data such as for example who owns the property, what upkeep, changes, features, details, maintenance are in a non corruptible public ledger, and smart contracts can process the purchase, name, and escrow with 100% data integrity and get rid of 99. All property / properties will eventually have an actual address in the blockchain.9% of the prevailing fraud.
