This book, written for the general public, aims to reveal the secrets of a technology that's destined to change the world, from its origins to its revolutionary capabilities, from its variety of applications in economic, financial and bureaucratic processes to its capability to make both public and private institutions more efficient. Touching on regulated money, copyright, digital voting and administrative transparency, Andrea and Massimo Tortorella introduce readers to innovation that will become a fundamental element of modern existence. And there is absolutely no heading back. Because, after barter, coin, precious metal, dollars and central banking, a fresh economic standard has risen over the horizon of the brand new millennium.
