Bitcoin to Zero: what do you think about this ?

[continue reading](#)

Despite how bitcoin is now worth substantially more than when the cryptocurrency initially attracted attention from investors, naysayers exist that assert it' They state that as even more cryptocurrencies come on the scene, the chance rises a better one will replace bitcoin, leading to its plunge to zero. Some of the associated myths are especially pervasive. Some analysts say that although bitcoin reigns supreme in the cryptocurrency market now, that won't be the case forever. what do you consider about this ?s only a matter of period before it plunges to zero.
