Over 3 million U. Blue Water Navy Vietnam Veterans and Agent Orange Exposure comprehensively examines whether Vietnam veterans in the Blue Drinking water Navy experienced exposures to herbicides and their contaminants by reviewing traditional reports, relevant legislation, key personnel insights, and chemical analysis to resolve current debate on this issue. At the request of the VA, the Institute of Medication (IOM) examined whether Blue Drinking water Navy veterans had similar exposures to Agent Orange as various other Vietnam veterans. Since that time, the Division of Veteran Affairs (VA) has generated that Vietnam veterans are automatically eligible for disability benefits should they develop any disease connected with Agent Orange exposure, however, veterans who offered on deep ocean vessels in Vietnam are not included. Herbicides found in Vietnam, specifically Agent Orange have already been associated with a variety of cancers and other long term health issues from Parkinson's disease and type 2 diabetes to heart disease. Prior to 1997 laws safeguarded all service men and women deployed to Vietnam including people of the Blue Navy. Because the end of the Vietnam War, veterans have reported several health results. These "Blue Water Navy" veterans must confirm they were subjected to Agent Orange before they can claim benefits. military staff were delivered to Southeast Asia to fight in the Vietnam Battle.S.
